# About INOVANCE

Since establishment, Inovance has been focusing on core technologies, such as motor drive and control, power electronics and industrial network communication. By adhering to technical marketing and industry marketing and the strategy of providing customized "automation + process" solutions for industry segments, Inovance realizes values both for customers and itself.

After 16 years' development, Inovance has grown from a pure AC drive supplier into a provider of comprehensive hydromechatronic products and solutions. Currently, Inovance's products mainly cover: ① Industrial automation products serving for intelligent equipment, including various core components such as AC drives, servo systems, control systems, industrial vision systems, sensors, high-performance motors and high-precision screws, and integrated hydromechatronic solutions; ② Core components, machines and solutions serving for industrial robots, including robot control systems, servo systems, vision systems, high-precision screws, SCARA robots and 6-axis robots; ③ Powertrain products serving for new-energy vehicles, including various inverters, auxiliary power systems, high-performance motors, DC/DC power and powertrain systems; ④ Traction and control systems serving for rail transit, including traction converters, auxiliary converters, medium-voltage cabinets, traction motors and train control and management systems (TCMs); ⑤ Aftermarket industrial IoT solutions, including industrial clouds, application development platforms, intelligent hardware, and information management platforms. Inovance's products are widely used in various industries, including new-energy vehicles, elevators, air compressors, industrial robots/manipulators, 3C manufacturing, lithium battery, cranes, machine tools, metal products, wires and cables, plastics and rubber, printing and packaging, textile and chemical fibers, construction materials, metallurgy, coal mining, municipal construction, and rail transit.

As a high-tech enterprise specialized in R&D, production, and sales of industrial automation and new energy products, Inovance has mastered a series of core platform technologies such as high-performance vector control AC drive, servo system, programmable logic controller (PLC), encoder, and permanent magnet synchronous motor (PMSM) technology, as well as application technologies in industries such as new energy vehicle, elevator, crane, injection molding machine, textile, metal products, printing and packaging, and air compressor.

By December 31, 2018, Inovance has obtained 1,120 patents and software copyrights (excluding those under application), covering 260 invention patents, 570 utility model patents, and 146 design patents, and 144 software copyrights. In 2018, Inovance obtained 31 new invention patents, 157 new utility model patents, 42 new design patents, and 15 software copyrights.

Inovance was listed on the GEM Board of the Shenzhen Stock Exchange in September 2010, stock code: 300124.

## Service Network

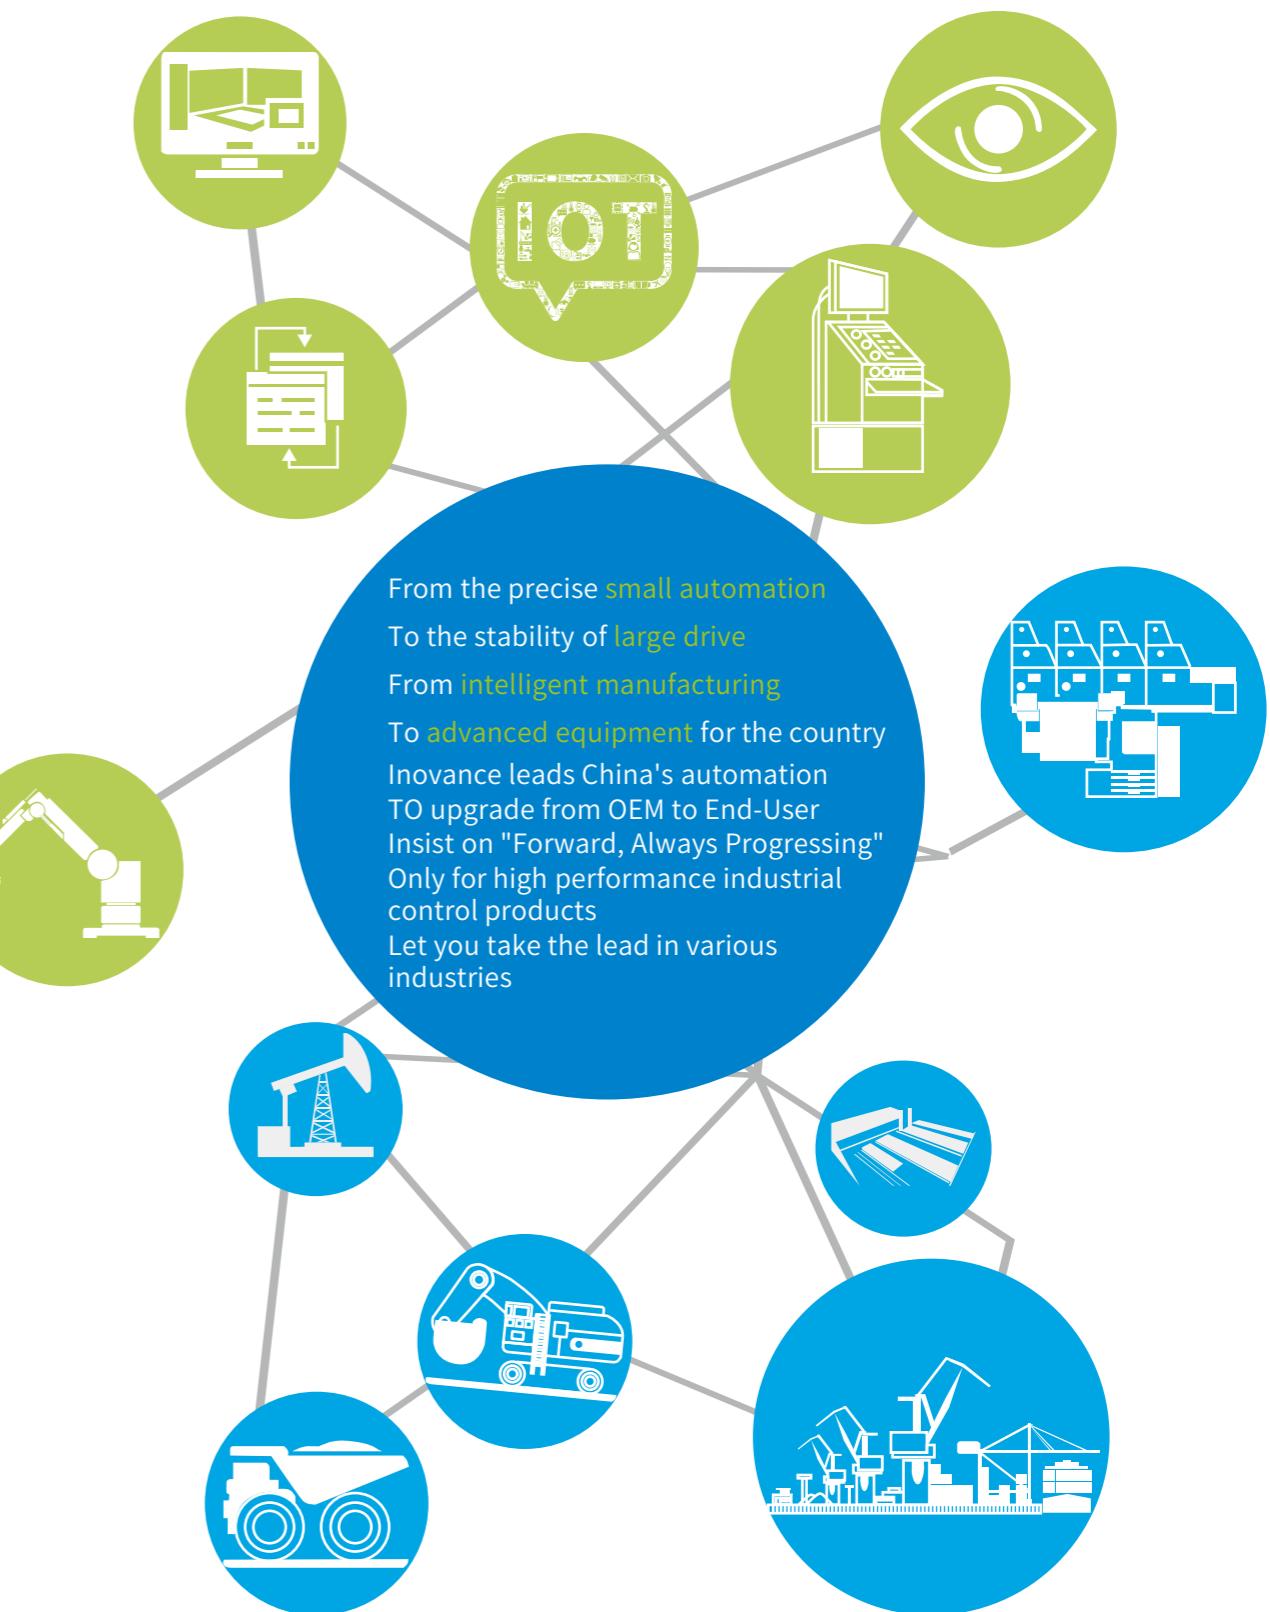

The company is headquartered in Shenzhen and has many subsidiaries in Suzhou, Hong Kong, etc

67 offices in China Over 500 sales and service engineers 271 authorized agent

580 joint insurance centers 5 spare parts warehouses

# INOVANCE Everywhere

# MD880 series High Performance Engineering Converter

Engineering Converter, New Product, New Benchmark

Support industry upgrading

## Overview

MD880 is a high-end frequency conversion and speed regulation product technology platform of Inovance Technology, which is divided into two topologies: single drive and multi drive. It is a drive product positioned at high-end drive application, high-performance speed and torque control, high reliability, flexible system integration, friendly debugging and maintenance, and high power density. Whether it's the module structure, power density, response and accuracy, or the application scope of the product, MD880 has set up a new industry benchmark.

## Application

### ■ Metal

High speed line bar and strip hot rolling equipment, wide and thick plate equipment, cold rolling machine, pickling line, annealing line, galvanized line, color coating line, non-ferrous alloy manufacturing equipment, non-ferrous rolling equipment, etc.

### ■ Oil & Gas

Offshore drilling rig and workover rig, offshore modular drilling rig, land drilling rig, drilling rig retrofit, intelligent electric/battery driven tractor hoist, electric driven sand mixing Equipment and other petroleum engineering equipment.

### ■ Pulp & Paper

Paper making joint equipment, including continuous production lines of headbox, mesh, pressing, drying, sizing, hard calendering, coating, super calender, rewinder, etc.

### ■ Crane

STS crane, tyre (rail) container gantry crane, ship unloader, grab gantry crane, large shipbuilding gantry crane, large metallurgical casting crane, etc.

### ■ Marine

Electrical propulsion, winch drive, new energy vessel and DC grid, etc.

### ■ Cable

Large frame winch, winch, copper/aluminum large wire drawing machine (with multi motors), etc.

### ■ Wind power converter, test stand, PCS, mining

# Highly flexible modular design

Support the free building of software and hardware modules, and meet your customized needs without changing the code

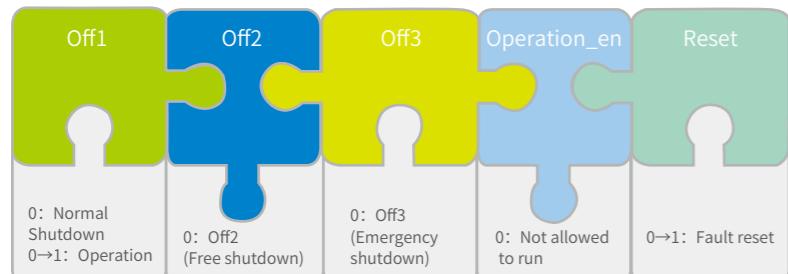

- ① Enjoy the fun of free programming
- ② Flexible commissioning of open data flow chart
- ③ Flexible configuration of various expansion cards

01

## Free Programming

### Control word free configuration

Expansion card input terminal status, control board input terminal status, drive status word, drive operation status data.

Definition of common control words

### Software modular free configuration

Call resource pool (variable data of each software block, bus process data, speed channel, torque channel, ramp function generator, etc.).

02

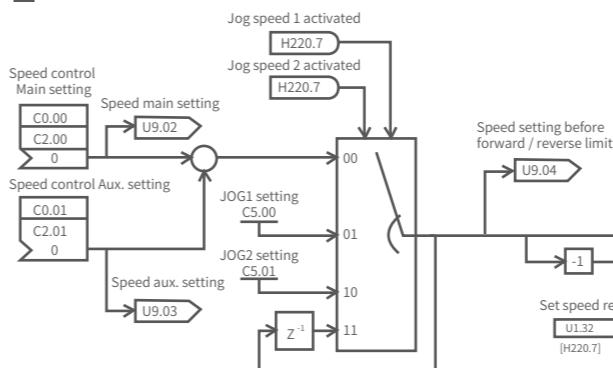

## Flexible Commissioning

### Graphical control process

### Transparent control scheme

### Automatic problem tracking

### Clear Function Definition

03

## Various Expansion Cards

### HCU Controller packaged independently, with 3 expansion slots

### External expansion up to 7 expansion slots

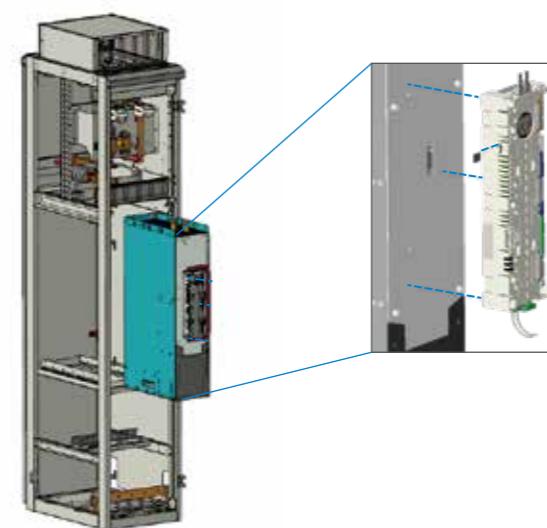

### Support multiple types of expansion modules

01

## Fast troubleshooting on site

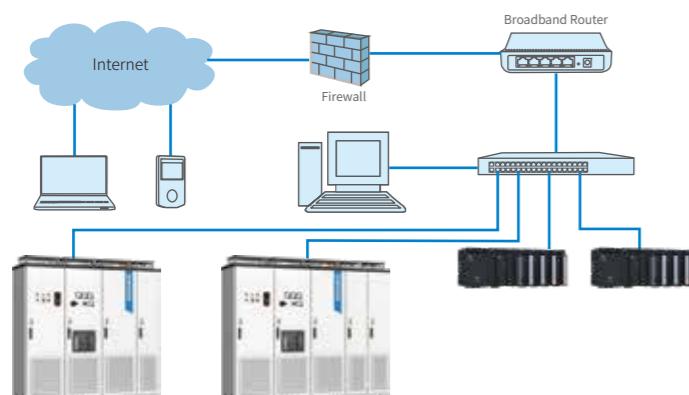

- No need to replace HCU controller, no need to remove communication, control and encoder cables, no need to burn back-up parameters and system software, quickly restore production line operation, reduce operation loss;
- The HCU controller adopts plug-in SD card, which can store parameters and system software to realize quick replacement of HCU;
- The system clock powered by battery will not be affected by power failure, so as to ensure the time stamp of HCU event recorder is accurate and reliable.

02

## Remote diagnostic

- Under the authorization of customers, technicians can connect to the remote server on site through VPN, check the fault records, check the system parameters, observe the operation data, help customers quickly locate the fault, optimize the process, and improve the production efficiency.

03

## Redundancy design of bus software

- Prevent data blockage, bus redundancy for information reliability.

04

## Black box function

- Store the waveform data within the specified time before and after for 50 faults;
- 1000 groups of data cycle over storage.

05

## Fault level self diagnosis

- Automatically judge the fault level and display the fault information in real time on the LCD screen, so as not to report the fault randomly and stop the machine easily, and provide guidance and analysis for the fault.

Level 1	Fault free stop
Level 2	Fault deceleration stop
Level 3	Fault, continue derating operation
Level 4	Continue operation, limit frequency
Level 5	Continue operation, can't start again
Level 6	Continue operation, can restart
Level 7	Ignore fault

- ① Fast troubleshooting on site
- ② Remote diagnostic
- ③ Redundancy design of bus software
- ④ Black box function
- ⑤ Fault level self diagnosis

Stable and Reliable Performance  
10 years of long life time and stable hardware, multiple fault handling methods  
to ensure the on-site recovery of production in average 30min

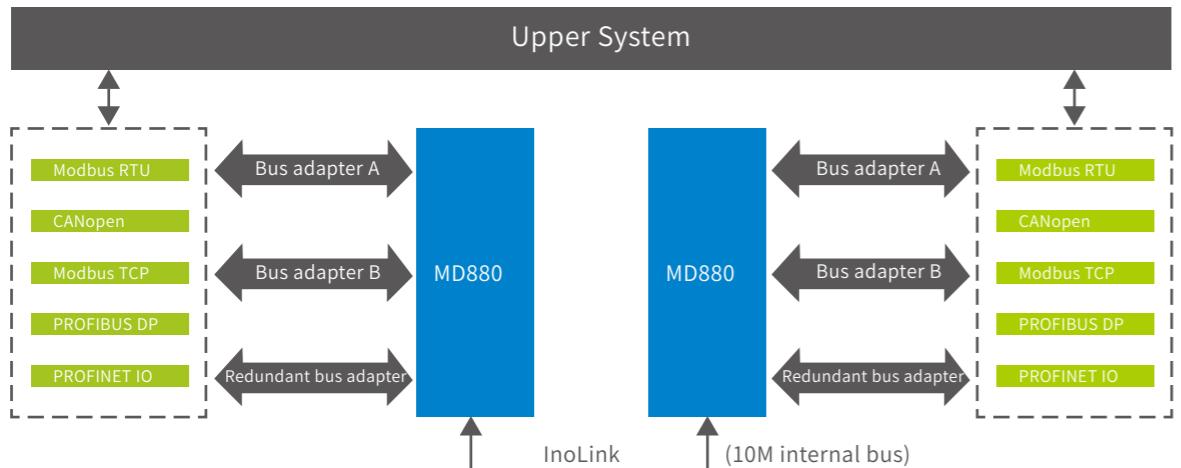

# Perfect Adaptability and Compatibility

Without changing the original program of PLC, the perfect compatibility of various upper systems

- ① The perfect compatibility of various upper systems
- ② Built-in motor simulation model
- ③ Optional structure mounting bracket
- ④ Sufficient capacitance for inverter

## 01 Compatibility of upper systems

- Powerful data conversion tool + parameter interconnection + bus adaptation function, no need to change the upper system program and configuration file, perfect compatibility with any communication bus type.

## 02 Built-in motor simulation model

- The unique design of motor simulation model, breaks the high threshold of upper system debugging, and makes debugging simple and fast.

## 03 Structure mounting bracket

- Support the specific frame size structure similar to the existing customer's converter power module, which can realize the quick replacement / retrofitting on site.  
(Optional)

## 04 Inverter w. Sufficient capacitance

- MD880 has lower limitation on rectifier; due to the inverter with sufficient capacitance and makes it very compatible with third-party rectifier.

Liberate you from the complex work

## InoDriveStudio: Professional PC commissioning software

SOP-20-880: Smart operation panel

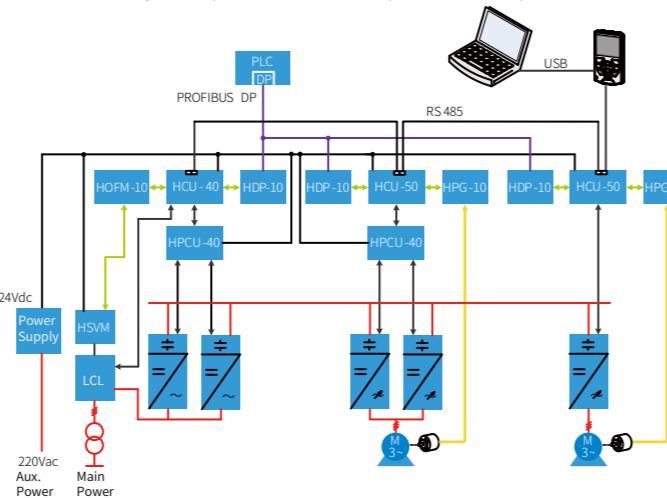

# MD880 multi-drive system topology and characteristics

01

## InoDriveStudio Quick Commissioning

InoDriveStudio is a standard PC commissioning software for the multi drive product family of Inovance Technology. The software interface is friendly and easy to use. The commissioning engineer can complete the simple configuration, parameter setting, fault detection, system maintenance and service of the complex system in a short time through the menu operation of the graphical interface.

InoDriveStudio can record the trend of up to 8 signals, which simplifies the diagnosis and optimization of frequency converter. Meanwhile, the internal high-speed data recorder of HCU controller can be accessed, and the information of 50 observed objects before and after the fault can be completely restored, which can help the engineer to locate the fault efficiently and optimize the control process of the production line.

02

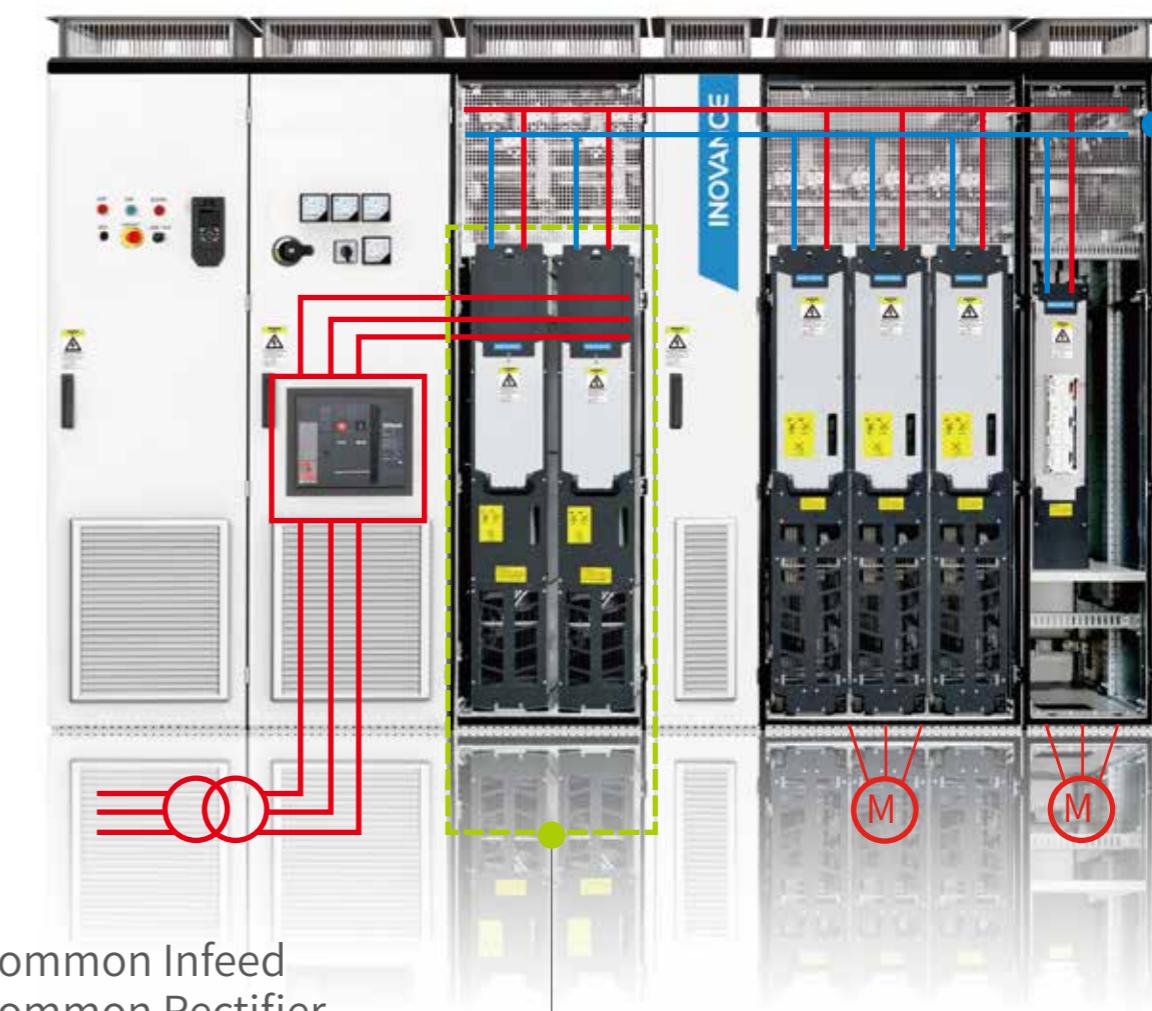

## SOP-20-880 Operation Panel

- LCD Screen
- 240mm×160mm
- PC can connect to HCU via SOP-20's mini USB port
- Language: Chinese / English
- 8-line text display
- Parameter copy and recovery

## Common DC Bus

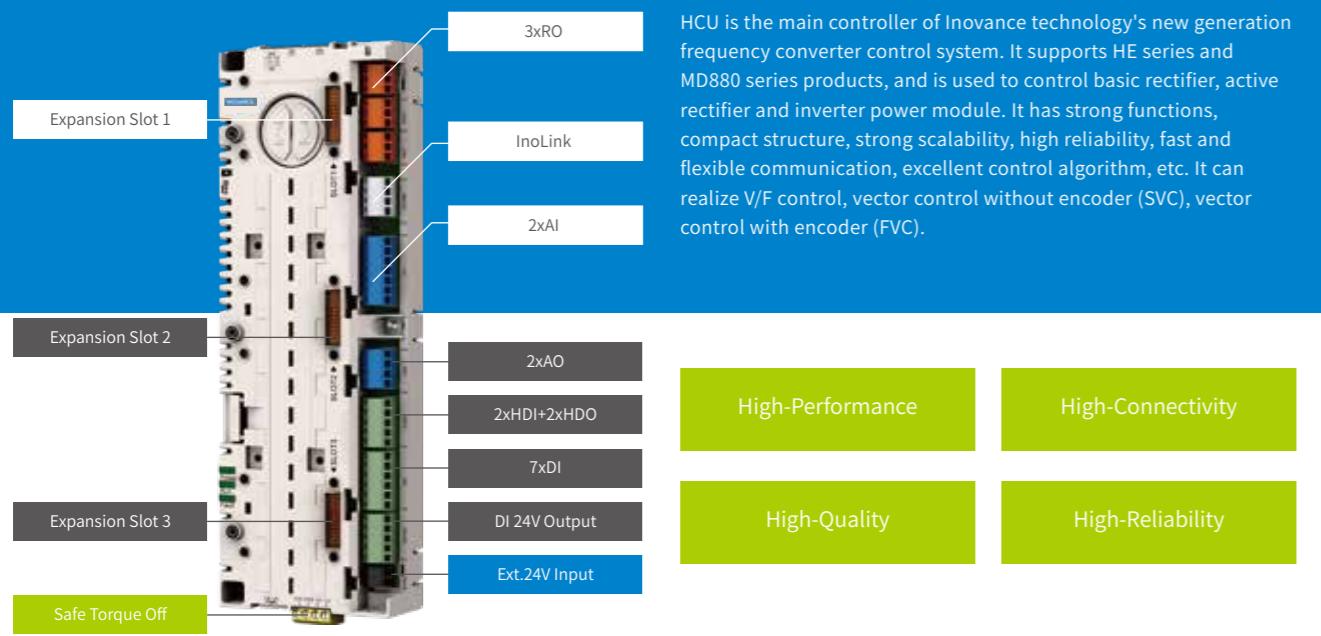

- Effectively reduce the rectifier module and brake module current and the device capacity.
- In the crane or uncoiling application, the regenerative energy can be shared through the common DC bus.
- Chassis module can effectively use the depth of the cabinet, improve the utilization rate of the cabinet, reduce the number of the cabinet, and save 30% - 60% of the floor area.
- The power module and optional parts can be assembled in the standard cabinet to ensure the overall high quality of the drive system. 2 alternatives: chassis or cabinet to meet the diversified needs of integrators and end users

## Common Infeed Common Rectifier

- Compared with single-drive, a large number of infeed cables and protection equipment are saved;
- Ensure the overall safety and control function of the device, and improve the reliability.

13	Process Data Acquisition Module	HIBA-10	PDA module

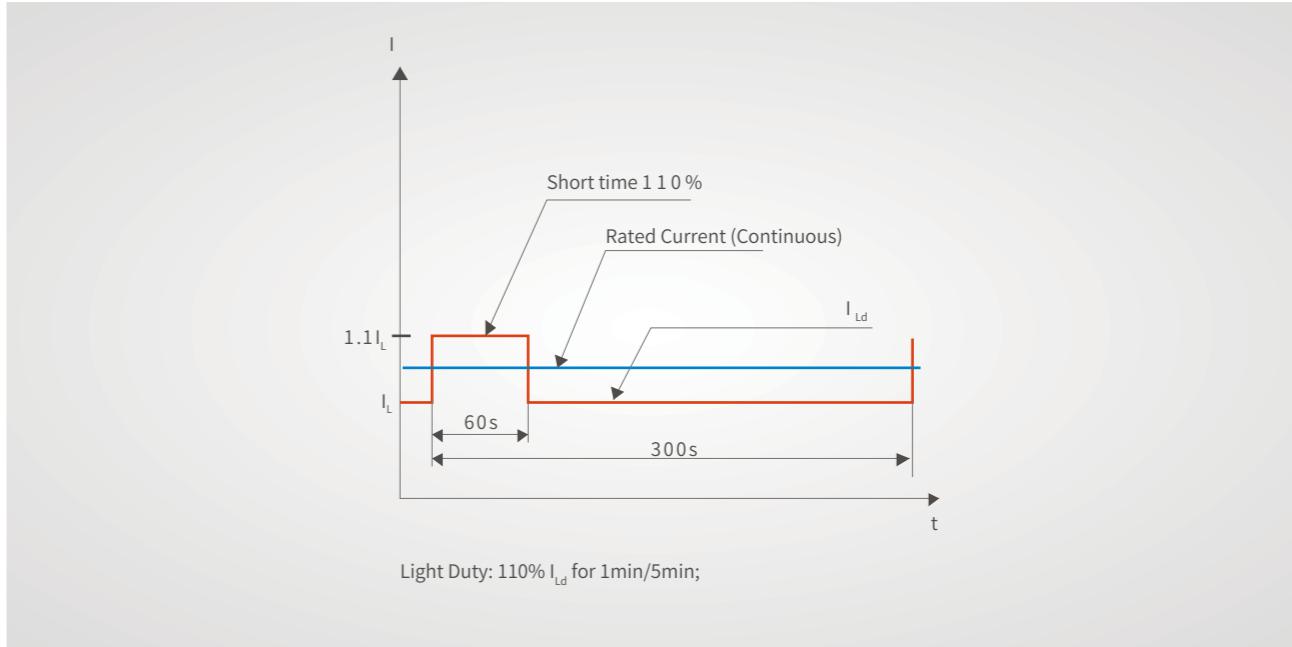

# MD880 Technical Specifications

## MD880 General Parameters

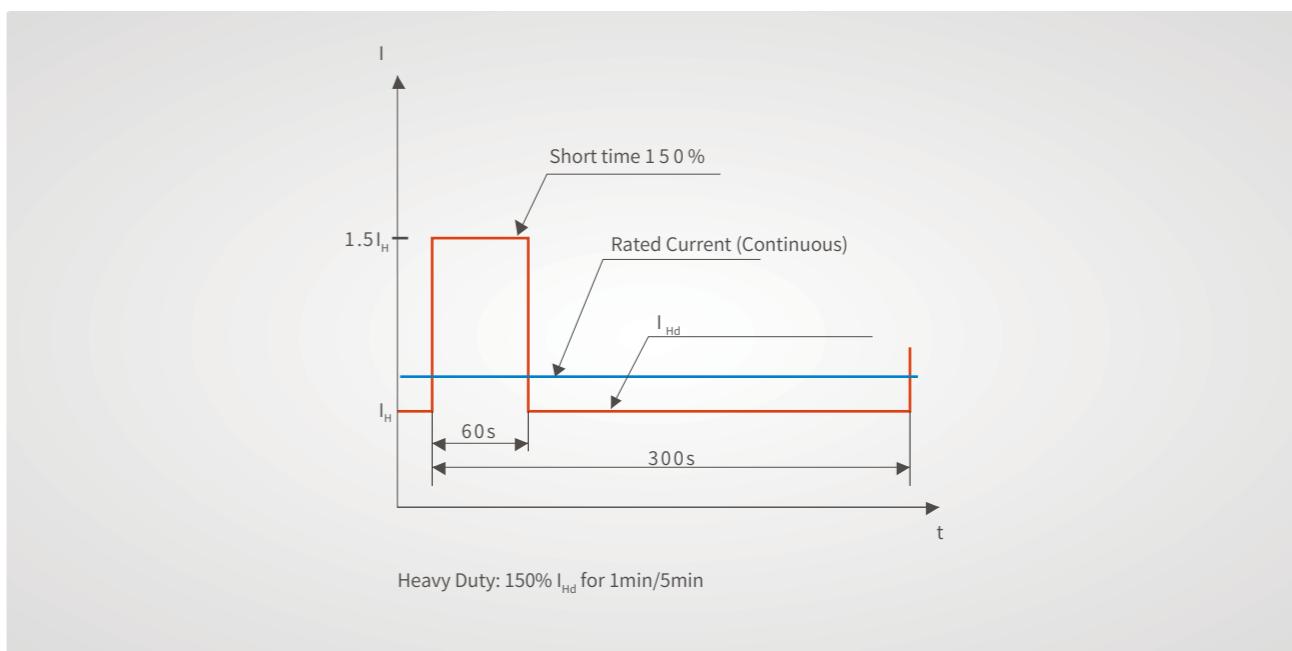

Item	Specifications
Basic Rectifier	Input AC Voltage 4: 380~415VAC, 7: 525~690VAC; -10%~+10% (-15%, <1min)
	Frequency Range 47-63Hz
	Output Voltage 4: 540~590VDC, 7: 740~975VDC
	Overload Capacity Light Duty: 110% ILd for 1min/5min; Heavy Duty: 150% IHd for 1min/5min
	Efficiency 99%
	Power Factor $\cos\phi>0.95$ (fundamental)
Regen-erative Rectifier	Input AC Voltage 4: 380~415VAC, 7: 525~690VAC; -10%~+10%(-15%, <1min)
	Frequency Range 47-63Hz
	Output Voltage 4: 540~590VDC, 7: 740~975VDC
	Overload Capacity Light Duty: 110% ILd for 1min/5min; Heavy Duty: 150% IHd for 1min/5min
	Efficiency >98%
	Power Factor $\cos\phi>0.95$ (fundamental)
AFE Rectifier	Input AC Voltage 4: 380~415VAC, 7: 525~690VAC; -10%~+10% (-15%, <1min)
	Frequency Range 47-63Hz
	Output Voltage 4: 570~720VDC, 7: 790~1035VDC (Adjustable)
	Overload Capacity Light Duty: 110% ILd for 1min/5min; Heavy Duty: 150% IHd for 1min/5min
	Efficiency >97%
	Power Factor Adjustable (default setting: $\cos\phi=1$ )
Inverter/Single Drive	Input Harmonic THDu<5%, THDi<5% (at rated current)
	Input AC Voltage Inverter: 4: 540~720VDC, 7: 740~1035VDC; Single Drive: 380~480VAC
	Output Voltage Inverter: 4: 0~415VAC, 7: 0~690VAC; Single Drive: 0~480VAC
	Output Frequency 0~300Hz
	Efficiency >98.5%
	Motor Control Mode V/F, SVC, FVC
Control Unit Interface	Speed Range V/F: 1:50, SVC: 1:200, FVC: 1:1000
	Speed Accuracy SVC: $\pm 5\% F_{sl}$ (motor slip), FVC: $\pm 0.01\%$
	Torque Response SVC $\leq 5ms$ , FVC $\leq 5ms$
	Torque Control Mode No speed sensor vector control (SVC), with speed feedback vector control (FVC)
	Start Torque 0.5Hz/150%(SVC)、0Hz/200%(FVC)
	Overload Capacity Light Duty: 110% ILd for 1min/5min; Heavy Duty: 150% IHd for 1min/5min
Environment	Analog Input 2 AI: -10V~+10V or -20mA~+20mA Jumper selection
	Analog Output 2 AO: 0V~10V or 0~20mA Jumper selection
	Digital Input 7 DI:NPN/PNP;"0"<5,"1">15,Rin:2K ohm;
	High Speed Digital Input 2 HDI:NPN/PNP;"0"<5,"1">15,Rin:2K ohm;24V Logic level, Input Frequency <100kHz
	High Speed Digital Output 2 HDO: OC; Max Input Voltage 30VDC; 24V Logic level, Output Frequency <100kHz
	Relay Output 3 RO: NO or NC output; 250V AC/30V DC, 2A
Mechanical Data	Smart Panel and PC connection Interface: 2x RJ45; physical layer:EIA-485; master/slave, max communication speed:4Mbps
	Safety Function STO
	Inolink Communication physical layer:EIA-485; max communication speed:5Mbps
	Operate Ambient temperature -10 to +40 °C, no frost allowed, +40 to +50 °C with derating
Mechanical Data	Storage Ambient temperature 5 to +90 °C no condensation
	Altitude 0 to 1,000m Without derating, 1,000 to 4,000m With derating
	Anti Vibration GB/T4798.3 - 3M4 vibration level
	Protection Degree Module:IP00; Cabinet:IP21, option: IP23, IP43
Safety	Safety EN 61800-5-1
	Cooling Method Forced Air-Cooled EN 60146

# MD880 Multi Drive Ordering Guide

## MD880-50 Inverter

Inverter: MD880-50...	Frame Size	Ordering No.	Qty.	Remark
0144-7	H6	1.MD880-50M-0144-7	1	Inverter
0192-7	H6	1.MD880-50M-0192-7	1	Inverter
0217-7	H7	1.MD880-50M-0217-7	1	Inverter
0270-7	H7	1.MD880-50M-0270-7	1	Inverter
0340-7	H8	1.MD880-50M-0340-7	1	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.H8-quick-kit	1	H8 quick connection kit
0410-7	H8	1.MD880-50M-0410-7	1	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.H8-quick-kit	1	H8 quick connection kit
0530-7	H8	1.MD880-50M-0530-7	1	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.H8-quick-kit	1	H8 quick connection kit
0600-7	H8	1.MD880-50M-0600-7	1	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.H8-quick-kit	1	H8 quick connection kit
0779-7	2×H8	1.MD880-50M-0410-7	2	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-40	1	Parallel Running Control
		4.H8-quick-kit	2	H8 quick connection kit
1007-7	2×H8	1.MD880-50M-0530-7	2	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-40	1	Parallel Running Control
		4.H8-quick-kit	2	H8 quick connection kit
1140-7	2×H8	1.MD880-50M-0600-7	2	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-40	1	Parallel Running Control
		4.H8-quick-kit	2	H8 quick connection kit
1510-7	3×H8	1.MD880-50M-0530-7	3	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-40	1	Parallel Running Control
		4.H8-quick-kit	3	H8 quick connection kit

Inverter: MD880-50...	Frame Size	Ordering No.	Qty.	Remark
1710-7	3×H8	1.MD880-50M-0600-7	3	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-40	1	Parallel Running Control
		4.H8-quick-kit	3	H8 quick connection kit
2280-7	4×H8	1.MD880-50M-0600-7	4	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-40	1	Parallel Running Control
		4.H8-quick-kit	4	H8 quick connection kit
2850-7	5×H8	1.MD880-50M-0600-7	5	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-60	1	Parallel Running Control
		4.H8-quick-kit	5	H8 quick connection kit
3420-7	6×H8	1.MD880-50M-0600-7	6	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-60	1	Parallel Running Control
		4.H8-quick-kit	6	H8 quick connection kit
3990-7	7×H8	1.MD880-50M-0600-7	7	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-A0	1	Parallel Running Control
		4.H8-quick-kit	7	H8 quick connection kit
4560-7	8×H8	1.MD880-50M-0600-7	8	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-A0	1	Parallel Running Control
		4.H8-quick-kit	8	H8 quick connection kit
5130-7	9×H8	1.MD880-50M-0600-7	9	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-A0	1	Parallel Running Control
		4.H8-quick-kit	9	H8 quick connection kit
5700-7	10×H8	1.MD880-50M-0600-7	10	Inverter
		2.HCU-50	1	Control Unit for 50M
		3.HPCU-A0	1	Parallel Running Control
		4.H8-quick-kit	10	H8 quick connection kit

Note: when H8-quick-kit (option) is not selected, copper bar is needed for connecting input power cable to rectifier AC input.
